s500 IP Desk Phone

s500 IP Desk Phone

The Sangoma s500 telephone gives you great features with four Session Initiation Protocol (SIP) accounts and a competitive price point.

The Sangoma s500 IP Phone is designed exclusively for FreePBX

The s500 is so smart you can quickly and easily use it right out of the box. It features industry standard Power over Ethernet, so no power cable or outlets required. They have full duplex speaker-phones, dual Ethernet Ports, multi-way conference calling, high definition voice quality, and they're Virtual Private Network (VPN) capable.

Full Integration with FreePBX

FreePBX phone apps are available right on the phone, straight out of the box with no requirement for additional licenses. Users can control complicated features directly from their phones. There's no need to remember feature codes. User applications include: Call Parking, Follow Me, Do Not Disturb, Conference Rooms, Call Forwarding, Time Conditions, Presence, Queues, Transfer to Voice Mail, Visual Voice Mail, and Log in/out.

Please visit our Wiki at:

<http://wiki.freepbx.org/display/PHON/Phones+Home> for the s500 user guide and instructions on how to setup the device.

Packaging Contents

s500 Phone

Handset

Stand

Handset Cord

Ethernet Cable

Completed with FCC Part 15 Standards
FCC Part 15 Class B

This device is compliant with Power over Ethernet (PoE) 802.3af Class 3 and can therefore be powered from a PoE compliant switch or hub. For customers requiring AC power, AC to DC adapters can be purchased separately from Sangoma. Alternatively, if you want to source your own power supply, the specifications must meet the 5V / 1.2A input rating. If the wrong power supply is used and the unit is damaged, the warranty will be void.
